FaceTime - checklist

How to use FaceTime on a mobile device:

You will need:

• An Apple device (e.g. iPhone/iPad) connected to the internet. (Hint - If you’re using a mobile device there may be charges applied)

Steps to use FaceTime on a mobile device:

• Select FaceTime to open it (Hint - It is already installed on all Apple devices)
• Select the + button
• Type in the phone number / email of the person you want to contact (Hint - They will also need an Apple device to use FaceTime)
• Select video (video call) or audio (voice call) to contact that person
• To end a call press the red telephone button

Next steps:

• Start adding friends and family to the app and chat with them

For more information, see the following Learn My Way course:

• Video calling
